# Description

**Upgrade your security with the Cybernautt X90 Triple Lens AI Security Camera, the best CCTV camera for both home security and industrial camera needs.**

This cutting-edge AI monitoring camera features 1 fixed lens and 2 pan-and-tilt lenses, offering unparalleled coverage to monitor every nook and corner. With a combined 8MP resolution and 8MP HD clarity, this outdoor camera ensures crystal-clear footage day and night.

The Cybernautt X90 is packed with outstanding AI capabilities, including human detection and tracking, customizable monitoring zones, and motion detection push notifications. Its advanced alarm system keeps you alerted to any suspicious activity. Whether it's day or night, this AI camera automatically switches to color night mode with LEDs or IR night mode for superior visibility in low-light conditions.

Control your security effortlessly with the app-controlled remote viewing feature, allowing you to monitor your property from anywhere in the world. The camera supports two-way communication, external storage up to 256GB, and pan-tilt functionality for flexible monitoring. One lens can be moved manually, while the other two can be adjusted horizontally and vertically via the app.

Perfect for home security, industrial surveillance, or outdoor use, the Cybernautt X90 is also available as a 4G SIM camera, making it the best 4G CCTV camera for areas without Wi-Fi. Experience the future of security with this AI-powered CCTV camera that combines innovation, reliability, and ease of use.

## Key Features:

**Triple Lens Design:** 1 fixed lens + 2 pan-and-tilt lenses for complete coverage.

**8MP Combined Resolution:** 8MP lens for sharp, detailed footage.

**8MP HD Clarity:** Best-in-class resolution for superior image quality.

**AI-Powered Security:** Human detection, tracking, and customizable monitoring zones.

**Motion Detection & Alerts:** Instant push notifications for any activity.

**Color & IR Night Vision:** Automatically switches to night mode for 24/7 monitoring.

**Two-Way Communication:** Speak and listen through the camera remotely.

**Pan-Tilt Functionality:** Adjust angles horizontally and vertically via the app.

**App-Controlled Remote Viewing:** Monitor your property from anywhere in the world.

**External Storage Support:** Up to 256GB for extended recording.

**4G SIM Compatibility:** Best 4G CCTV camera for areas without Wi-Fi.

**Outdoor & Indoor Use:** Durable design for home security and industrial camera applications.

The Cybernautt X90 is the best AI security camera for those seeking advanced features, reliability, and peace of mind. Whether for home security or industrial surveillance, this AI monitoring camera delivers unmatched performance.
