# Description

## **CYBERNAUTT 2.4MP FHD COLOR NIGHT VISION COMPLETE SET**

Featuring an 8-channel 5 MP DVR, eight outdoor dual-light CCTV cameras with audio capabilities, a 2 TB hard drive, an 8-channel SMPS, Cybernautt 70-meter cable roll, along with HDMI and BNC connectors.

Camera Description: This system delivers superior imaging with 2.4 Megapixel resolution, complemented by dual-light technology for enhanced color night vision and audio recording. Its high-performance CMOS supports Analog HD output with recording resolutions up to 1080P, providing excellent Color Vision both day and night. The Smart IR feature offers illumination up to 20 meters with white light and 25 meters using infrared. It includes a single port that accommodates four switchable signals (TVI/AHD/CVI/CVBS) and transmits high-quality audio via coaxial cable with a built-in microphone.

This system can be easily connected to mobile devices via the internet using an application, allowing for real-time viewing of live cameras and recorded footage from any global location. Additionally, it supports AHD, HDCVI, HDTVI, CVBS, and IP video signal inputs. The DVR is equipped with VGA and HDMI outputs, supports coaxial audio, and features one LAN/Network RJ45 port alongside two USB ports.

DVR Specifications: The Cybernautt 5MP Supported 8-channel Turbo HD DVR includes audio recording for all channels and supports advanced human and vehicle analysis through deep learning-based target classification for Motion Detection 2.0. It accommodates IP camera inputs of up to 5 MP and supports third-party cloud storage. The DVR has one SATA connection with a capacity of up to 10 TB and video bit rates ranging from 32 Kbps to 6 Mbps. It is compatible with HDTVI, AHD, CVI, CVBS, and IP video inputs, while audio is transmitted via coaxial cable.

The Cybernautt DVR, cameras, and hard drive are backed by a two-year warranty.
