Description

FUNCTIONAL PEN WITH CAMERA

This pen operates and writes like any standard pen, making it easy to carry the camera during meetings, lectures, or interviews. Since you're already bringing a pen for notes, this device also features 1080HD video and audio recording capabilities, enabling you to take notes and, when necessary, capture high-definition video.

DISCREET DESIGN

Our compact camera seamlessly integrates into its environment by remaining entirely silent and unlit. It looks just like an ordinary pen, making it perfect for use in any setting where pens are typically found without raising suspicion.

VERSATILE USAGE

The pen is useful for numerous applications, such as documenting infidelity, recording conversations with strangers, capturing lectures for later study, and providing proof of delivering significant documents. It conveniently clips onto shirt pockets or notebooks, ensuring it stays securely in place without slipping out.

RECORDING DETAILS

After a full charge, the camera can record 90 minutes of video and audio. Charge the pen camera for 60 minutes before its first use.
