Description

Discreet Home Security Camera – Combining a 2-in-1 switch socket and surveillance camera, this covert device allows you to monitor your residence, family, property, nanny, housekeeper, office, or any personal area around the clock.

User-Friendly: This hidden nanny cam enables Wi-Fi remote viewing, records videos, and captures photos using the free Louche app. It also allows for the playback of videos stored on the SD card via your phone or computer. Setup is straightforward; simply follow the step-by-step instructions in the user manual.

Continuous Recording: Once the memory card reaches capacity, the oldest file will be overwritten by the newest one, ensuring uninterrupted recording with continuous loop footage. New video files will be saved every 10 minutes, so you won't miss any crucial moments. (Tip: periodically organize your files to prevent accidental deletion of important videos.)

Built-in 32GB SD Card: This device includes a 32GB SD card for immediate use.

Home Security Camera is your solution for monitoring your home, family, or pets while you're away. Simply situate this holder camera in any available outlet and rest assured you won't miss anything

Technical Specification

Recommended Uses For Product	Indoor Security
