Storage TF max.	128 GB(not include)

Description

3 CHANNEL CAR DASH CAMERA

Equipped with front, interior, and rear cameras, this dash cam provides a comprehensive view of your vehicle's environment. The front lens captures clear video of the road ahead, while the interior camera records your joyful moments inside the car. The rear camera aids in parking, facilitating easier maneuvers when you need to park.

FULL HD & WIDE ANGLE VIEW

Record every detail on the road with the FHD 1920x1080P Dash Camera. Featuring an F2.0 aperture, 6-layer glass lens, WDR, and HDR capabilities, this dashcam ensures crystal-clear images at night. The high-definition 1080P resolution and expansive viewing angles (170° front, 140° rear, 110° inside) cover every perspective, making it a must-have for safety-conscious drivers.

G-SENSOR & NIGHT VISION

The G-sensor detects and saves vital footage during sudden accelerations, braking, and accidents, ensuring key recordings are not lost to the loop recording feature. Enhanced night vision with LED lighting in both the front and rear lenses guarantees excellent visibility and automatic lighting, which bolsters safety while driving after dark.

LOOP RECORDING & 128GB SD CARD SUPPORT

The Loop Recording feature on this dash camera allows for uninterrupted recording, even when the SD card reaches capacity. It automatically overwrites older video files, enabling continuous capture without concern for storage limitations. Additionally, the camera accommodates a class 10 SD card of up to 128 GB (not included), providing abundant space for your recordings.

SIMPLE INSTALLATION

Setting up and using this dash cam is a breeze, thanks to reference images in the user manual. The included suction mount can be easily affixed to your windshield in just moments.
