Description

Keep Your Eyes on the Road, Anytime, Anywhere!

Meet the Cybernautt C1X with 24-Hour Parking Watch, the ultimate protector for your ride. This awesome dash cam delivers top-notch recording, reliable parking monitoring, and a bunch of features that keep you and your wheels safe on the go and while parked.

Cool Features:

HD Video Quality: Capture every little detail in stunning HD resolution. The Cybernautt C1X records in high def, giving you crystal-clear footage of your drives and any incidents that happen.

Wide-Angle Lens: With a 130-degree wide-angle lens, you get a broad view that covers multiple lanes and more of your surroundings. You won't miss any important moments on the road!

24-Hour Parking Watch: Keep your car secure even when you're not around. This feature monitors your vehicle all day and night, recording any suspicious activity or bumps, so you can relax knowing it's safe.

G-Sensor Technology: The built-in G-sensor picks up sudden movements or big hits, automatically locking and saving the footage so it doesn't get overwritten. This way, you've got solid proof if an accident happens.

Loop Recording: Enjoy continuous recording with the loop feature. When the memory card fills up, the dash cam automatically overwrites the oldest clips, keeping the latest footage at your fingertips.

Night Vision: Drive confidently even in low light. The Cybernautt C1X has advanced night vision tech, so you'll get clear and detailed video even when it's dark out.

Compact and Discreet Design: The sleek and compact design keeps this dash cam out of sight and doesn't block your view. It fits right into your car's interior for low-key surveillance.

Expandable Memory: This dash cam supports microSD cards up to 128GB, giving you plenty of storage for all your recordings. Easily transfer and manage your clips using your computer or any compatible device.
