Description

Wireless with 4G SIM Capability

Say goodbye to cumbersome routers and dongles! With built-in 4G SIM support, you can simply insert any SIM card and set up the camera in under 2 minutes through the app, allowing full remote access from anywhere in the world.

Crystal Clear Two-Way Audio Communication

Connect effortlessly with anyone near the camera using the integrated microphone and speaker. This vital feature enables you to engage in conversations or give instructions, making it simple to interact with guests or deter potential intruders.

Smart AI Motion Detection with Tailored Zones

Harness the power of AI-driven motion detection to establish specific areas for monitoring. You'll receive alerts only when motion occurs in these designated zones, minimizing false notifications and enhancing your security.

Rugged All-Weather Durability

Built to withstand harsh environments, this camera boasts an IP66 weatherproof rating. It operates seamlessly in temperatures from -10°C to 55°C, ensuring reliable performance no matter the weather conditions.

Flexible Storage Solutions

Choose between local recording on an SD card or leverage cloud storage for your video footage.
