Description

Smart Dual Lens 4G Solar Pan/Tilt Camera offers a horizontal rotation of 350 degrees and a vertical rotation of 90 degrees.

Equipped with a high-sensitivity microphone and speaker for two-way audio, it also features a built-in PIR sensor and a robust 18000mAh battery, alongside a 7W solar panel.

The camera includes active defense mechanisms with siren and lights, supports Micro SD cards up to 256GB, and provides optional cloud storage. It connects via 4G, allowing easy setup by scanning the QR code.

With area motion detection and humanoid detection capabilities, it can send push alarm notifications and enables remote monitoring via PC or mobile . It has an IP66 waterproof rating and 4000V lightning protection. Install it in three ways: ceiling, wall, or pole mounting. The camera features a 10X combined zoom and supports video compression formats: H.264/H.265/H.265+.
