Sensor LED Sur Mount

Tulip 12W R/S

Tulip LED Surface light normally dims off at 20% brightness in case there is no movement in detection area. It has an inbuilt microwave motion sensor which detects any moving object and it immediately make the light glow with full brightness.

Rated Power: 12W (on full brightness) which dims to 2.4W

Light glows with full brightness (12W) as long as motion is detected.

Automatically operates in Dim mode (2.4W) after 3 minutes in case of no movement.

Potential savings up to 80% of energy in common areas.

Surface mounted fixture, simple and easy to install.
