

MINI INTER CULTIVATOR [FRONT ROTATARY]

The mini power tiller has multiple functions with related tools. It's widely used in dry-lands, water fields and orchards in plains, mountains and hills, saving the trouble of large agricultural machinery not being able to enter the mountainous fields. It can be exercised freely in the field, with good tillage effect and high efficiency. It can be equipped with the corresponding equipment for pumping, power generation, spraying, and other operations, and can also be towed by a trailer for short-distance transport. The Mini tiller is characterized by its compact, powerful, light weight, small size and easy operation, most importantly, inexpensive, it become one of the most popular best-selling machines on the market.

MODEL	170F FRONT ROTATARY 3TGQ-4S
POWER	7HP/4.0KW
RATED SPEED	3600 RPM
DISPLACEMENT	212CC
START	RECOIL START
PACKING SIZE	980*650*650
GROSS WEIGHT	67 KG
