What is an AOV Camera?

AOV Low Power Camera

When there is a moving object:
Full frame recording

When there is no moving object:
Low frame rate recording

Ordinary Low Power Camera

When there is a moving object:
Normal recording

When there is no moving object:
Device sleep does not record

Next-gen AOV Camera & PIR Camera

AOV Low Power Camera

24-hour uninterrupted recording, with low-power recording when there are no moving objects in the area.

PIR Low Power Camera

When there are no moving objects in the area, the camera does not record video.

AOV Camera Working Mode

Full-frame recording after humanoid detection is triggered.

12:00 13:00 13:10 13:20 13:20 15:00

Low frame rate recording during standby time.

PIR Camera Working Mode

Full-frame recording after humanoid detection is triggered.

12:00 13:00 13:10 13:20 13:20 15:00

No recording in standby mode.

**Power Pixel 20 MP 4G ,8K UHD Four Lens, Four Views 10X Optical Zoom PTZ SOLAR CAMERA
With PIR, Human Detection, Motion Detection, voice intercom with inbuilt 28000 Mah Battery**

Product Features and Functions:

1. Adopts a 1.0T computing power high-performance AI main control, with four-way 20 MP high definition images and H.265+ encoding, ensuring clear and delicate images day and night.
 2. The gun-ball four-eye camera coordinates monitoring. The gun camera uses a small focal length lens, and the three gun camera images provide a large-range monitoring without dead angles. The ball camera uses a large focal length lens for capturing local details and target tracking.
 3. Supports precise human shape detection, with a detection distance of up to 100 meters diameter and a detection accuracy of 99.88%, which greatly reduces the problems of false detection and missed detection.
 4. Records 24 hours a day. When a human shape is detected, it can switch to full-frame rate recording as fast as 50ms to ensure no details are missed.
 5. Works with low energy consumption, avoiding frequent power on and off, and the system has better stability.
 6. Adopts H.265+ low coding technology, which saves storage space, reduces network bandwidth and 4G traffic consumption.
 7. The echo cancellation algorithm and noise reduction processing are deeply optimized to improve the effect of voice intercom.
 8. It has bigger battery capacity of 28000 MAH and has dual Solar panel for faster power charging
 9. Support TF storage upto 128gb and cloud storage (need to pay in V380 Pro app)
 10. Two-way voice intercom, Bi-directional video intercom, bi-directional video synchronized recording and playback; * Smart Alerts for People Detection: Motion-triggered alerts, APP push notifications and alert recording; * Automatic tracking: automatically follow the object when the webcam detects its movement
- * This is a 4g sim camera not a wifi camera. And images are just for display purpose this camera don't have hooter *Above Model may upgrade in body structure anytime without changing the specifications
