Description

Discreet Design: This WiFi security camera is cleverly disguised as a compact USB charger, featuring no light indicators and a fully concealed lens that remains invisible to the naked eye.

Real-Time Monitoring: Keep an eye on your Home, Office, or Pets with real-time viewing on your smartphone, offering crisp 1080P Full HD video quality no matter where you are.

Stable WiFi Connection: Operates on the 2.4GHz WiFi band, providing flexibility to connect to your home or office network for live viewing via the mobile app. The optimal installation distance between the WiFi router and the camera is within 15-20 Feet without barriers. Note: WiFi connectivity is always necessary.

Storage: Compatible with SD Cards ranging from a minimum of 16GB to a maximum of 128GB (recommended Sandisk Class 10 or higher). Note: SD Card is not included and must be purchased separately.

Recording Options: Choose between 1. Continuous Recording and 2. Motion Detection Recording (where light changes are detected as motion). Simply insert the SD card into the camera and use the app to start recording.

Playback Feature: Access your recorded videos directly from the app to view stored footage from anywhere; no need to physically remove the SD card from the camera.

User-Friendly Setup: Quickly connect the camera to an AC outlet or power bank, then link it to your home or office Wi-Fi following the easy 3-step instructions in the manual. For assistance, contact our technical support team, whose number is provided on the packaging.

Usage Scenarios: Perfect for monitoring employees at the office, safeguarding against theft/shoplifting, or watching over the movement of individuals with special needs, elderly family members, children, pets, and more .
